

**IN THE SPECIFICATION:**

**Please replace paragraph 56 with the following paragraph:**

**[00056]**        The embodiment of Figures 9-11 may also include one or more position sensing devices 58. Devices 58 may be, for example, a pair of electrical or mechanical contacts, which, for convenience, is shown in Figure ~~10~~9 only. The one or more position sensing devices 58 may be located on the pressure piston 14 and/or the first end cap 44a, or elsewhere on or in actuator 10A, to detect and indicate when the pressure piston 14 is in the released position and thus the parking brake of the vehicle has been released.
